

Project Title

Smart Capstone Project Marketplace and Monitoring System

Objectives

- To develop a centralized platform for managing Final Year projects.
- To allow faculty members and industry mentors to publish project ideas and opportunities.
- To help students explore available projects, form teams, and apply for suitable project topics.
- To facilitate collaboration among students, supervisors, and coordinators throughout the project lifecycle.
- To monitor project progress through milestone tracking, periodic progress updates, and report submissions.
- To provide a structured feedback mechanism for supervisors and coordinators.
- To maintain project-related documents and records in an organized and secure manner.
- To improve transparency, efficiency, and accountability in project supervision and evaluation.
